

# Power TIP 2

Check to see if you've been hacked and don't even know it.

The new trend is to forward your email without your knowledge nor consent; especially in the Real Estate and Mortgage Industry.

So, take the following simple steps to see if your customers and/or transactions are being stolen.

If you find out you're a victim take a picture of what it says on the "forward" and send it to [Itsupport@gmccloan.com](mailto:Itsupport@gmccloan.com) and also [compliance@gmccloan.com](mailto:compliance@gmccloan.com) so we may report it.

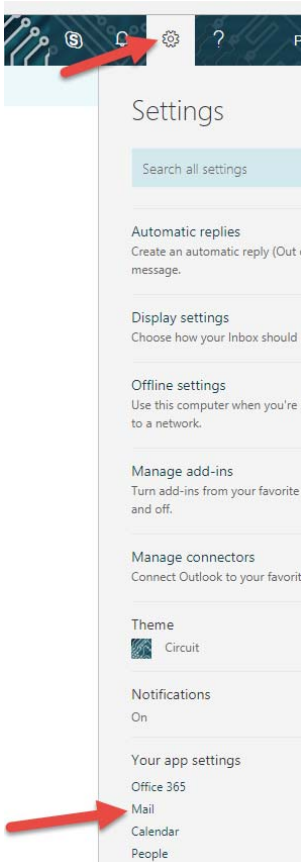

Log onto your on-line email

<http://email.gmccloan.com/>

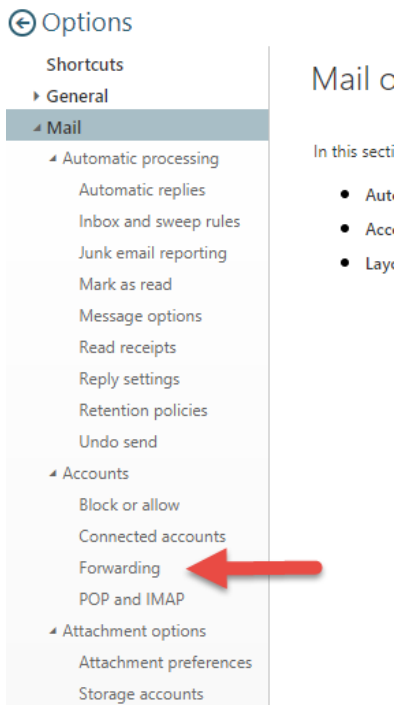

Click on setting (little sprocket wheel)

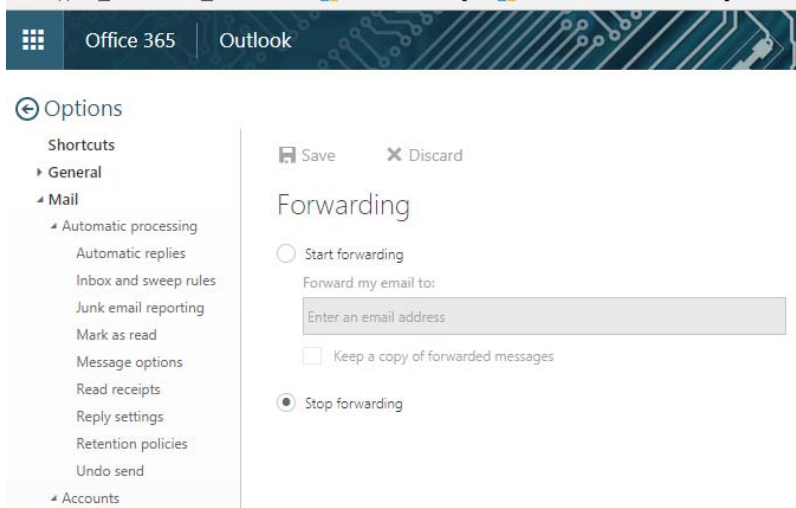

Click on mail

Click on "Forwarding"

Look and make sure your email is not being forwarded to another email.

Hackers now will forward your email and check the box to keep a copy.
